Total Other Income / (Expense) (\$3,520)

Net Income**\$73,340**

17.5%

Methodology & Disclosure Notes

1. Basis of Preparation: This statement was prepared on a cash basis, recognizing revenue when received and expenses when paid. Transactions were extracted from bank statements provided by the business owner.

2. Classification Method: Transactions were classified using a four-layer system: (a) known vendor matching from owner-provided supplier list, (b) merchant category pattern matching, (c) AI-assisted classification using business context, and (d) owner review of flagged items.

3. Owner Compensation: The owner operates as a single-member LLC. Owner draws totaling \$48,000 for the period are excluded from this statement as equity distributions, not operating expenses.

4. Vehicle Expense: Vehicle expenses are prorated at 70% business use per owner estimate. Total vehicle costs were \$17,800; \$12,460 allocated to business.

5. Depreciation: Equipment depreciation is calculated using straight-line method over estimated useful lives. This is a non-cash expense included for GAAP presentation.
